FOLD THIS BAND OVER THE STRING

FOLD EDGE · cut the page along this line

Papel picado cutting template

1. Fold 2–4 sheets of tissue paper in half lengthwise, then in half again (see the folding guide).

2. Cut this page along the solid line. The part with the gray areas is your template.

3. Lay it on the folded tissue with the FOLD EDGE on the folded edge. Clip the layers together.

4. Cut away every gray area through all layers: small holes first, the outer edge last.

5. Open the short fold and trim the bottom edge, then unfold everything.

6. Fold the top band over a string and glue it.
